FOR IMMEDIATE RELEASE
August 7, 2012

LEMO Demonstrates its Lightweight Compact COTS Connector Series Designed for Military, Security, Aerospace and Automotive during AUVSI 2012

Rohnert Park, California, August 7, 2012 — [LEMO](#), a global leader in the design and manufacture of precision custom connection solutions will be displaying its new connector series designed specifically for COTS military, security & aerospace, as well as other harsh environment applications that require robust performance in a lightweight compact size. The LEMO M Series Connector family offers insert configurations from 2 to 114 contacts and this product is focused on the design engineer that desires a MIL-38999 type connector but in a much smaller, compact and lightweight package with higher contact densities.

The M Series has been through extensive testing (EIA 364 and MIL-STD 810) to validate lightning strike, vibration, and other critical environmental, EMI shielding, and flammability attributes, desired in aerospace and military environments. The results were superb and confirmed LEMO's confidence in the family which offers compelling advantages.

LEMO will also be introducing a NEW USB connector to its M Series family of connectors. To learn more about the NEW USB and M Series connectors please visit the LEMO booth at the upcoming [AUVSI \(Association of Unmanned Vehicle Systems International\)](#), August 7-9, 2012 in Las Vegas, NV, Booth #3515. LEMO staff will be available with product samples and more specific product details.

About LEMO

LEMO is a global leader in the design and manufacture of circular precision custom connection solutions. LEMO's high quality push-pull connectors are found in a variety of challenging application environments including medical, industrial control, test & measurement, broadcast, automotive, audio-video, and telecommunications.

A list of LEMO's representatives and distributors can be found on the Web at www.LEMO.com. LEMO also provides cable assemblies, prototyping and custom designs with the same uncompromising commitment to quality.

For more information about LEMO connectors, please call (800) 444-5366 or visit www.LEMO.com. For editorial contact Julie Carlson, Marketing Communications, 707-206-3776 or jcarlson@lemo.com.
