From Concept to Design to Production - Let LEMO Help Turn Your Ideas Into Products!

LEMO’s custom cable solutions are designed and manufactured to meet the requirements of the customer’s specific needs. This is an integral part of the early design process.

LEMO helps to define the connectors and the cable that best fits the specific application and will guide the customer through the design process of choosing the appropriate materials and functionality required for power, signal and optical fiber choices.

LEMO has seen a trend in companies that rely on the supplier for their total package and the ability to get it right the first time and everyday.

Well Established Capabilities from Simple to Complex Assemblies and Value Added Solutions

LEMO’s Core Competency in Value Added Services is their expertise in designing complex cable assemblies. LEMO offers custom solutions including integrated electronics, overmold, electro-mechanical assemblies, and OEM services such as special packaging, labeling, and markings all with LEMO’s traditional and proven Quality!

LEMO Offers Solutions for the Following Types of Connections

- Multi Conductors (solder / crimp)
- Fiber Optics
- Coaxial / Triaxial
- NIM-CAMAC
- Fluidic / Pneumatic
- High / Low Voltage
- Thermocouple
- Environmentally Sealed
- Mixed / Hybrid

LEMO Understands the Market

Many companies, large and small, have found that working with the LEMO team on their specific applications is valuable when it comes to their expertise and knowledge of the different markets that they serve. LEMO offers the highest quality connector and cable solutions which provide dependable products for the following types of markets and applications:

Rugged and Harsh Products
- Soldier Man-Pack
- Vehicles and Marine Equipment
- Robotics and Unmanned Vehicles
- Aviation Headsets
- Satellite & Space Programs
- License Plate Recognition
- Automotive / Motorsport

Medical Diagnostics and Life Sustaining Products
- Catheter Devices
- Imaging Equipment
- Surgical Devices
- Medical Robotics
- Disposables
- Dermatology
- Ophthalmology
- Hospital Care Equipment
- Portable Medical Equipment
- Dental Lab Equipment

Other
- Industrial Controls (Motor Drives)
- Petroleum (Oil/Gas)
- Solar / Wind Power
- Nuclear
- Test & Measurement

All LEMO cable assemblies are 100% tested to meet the customers' specific requirements, including electrical, high / low voltage, and fiber optics.

LEMO’s Certifications

- ISO 9001:2005
- ISO 13485:2003
- IPC/WHMA-A-620
- UL & CSA Recognized

Why LEMO for your next project?

Working with LEMO gives the customer a chance to be involved with their project and to provide critical input. LEMO is acknowledged in high quality products, and their team is dedicated to satisfy the customer.
