

A large, modern, circular building with a glass and metal facade, featuring a prominent curved structure with multiple levels of balconies or walkways. The building is set against a clear blue sky.

LEMO UK

Complete Interconnect Solutions

LEMO UK Ltd is a sales, design, and manufacturing facility specialising in precision custom connection and cable solutions. Our modern factory, located in Worthing, West Sussex, spans over 4,000 sqm and offers a diverse range of services to businesses across the United Kingdom and Ireland.

SERVICES:

- Consultative sales and technical support
- Design and application engineering
- Connector assembly
- Cable assembly
- Standard connector distribution
- Quality Assurance

What we do

At LEMO UK, we manufacture high-performance interconnect solutions designed to perform in harsh environments from the deep sea to outer space. We specialise in producing metal and plastic connectors, along with precisely tailored cable assemblies, perfectly aligned with your device's exacting specifications and intended application.

Working with you

From initial concept to final production, we believe in a collaborative approach, starting with understanding your needs and staying connected with you throughout the entire process, from the initial design phase to the final delivery, to ensure flawless connectivity for fibre optic signals, power, fluids, or high-speed data transfer.

Our services

1 Consultative sales and technical support

From consultative field-based sales strategically spanning the United Kingdom to internal support, our dedicated team offers on-site consultation to enhance your development process and exceptional customer support for all your inquiries, including pricing, lead times, global stock availability, and general sales enquiries.

2 Design and application engineering

Our in-house design and application engineers partner with you, utilising the latest 3D CAD tools to deliver bespoke solutions tailored to your unique connection needs.

3 Connector assembly

Our UK site holds thousands of standard components that can be quickly and easily assembled and configured to order, in addition to our finished goods inventory. This service also includes the option to individually laser mark connectors to meet specific customer requirements.

4 Cable assembly

Our UK site is a fully equipped cable assembly manufacturing facility, providing a complete service to our customers. All cable assemblies are manufactured by our experienced technicians who specialise in the termination of both fibre and copper cables. We adhere to exacting standards, using the latest manufacturing equipment to ensure consistent high-quality products throughout the production cycle.

5 Standard connector distribution

Further stocks of standard parts are also held locally through official LEMO partners which include RS Components & Farnell Element 14, Astute Electronics, Canford, Argosy Components and FC Lane Electronics.

6 Quality assurance

Our UK facility meets ISO 9001:2015, ISO 14001:2015, ISO 45001:2018, and ISO 13485:2016 standards. All cable assembly and system solutions undergo rigorous visual and electrical testing ensuring the highest levels of quality throughout the manufacturing process.

About the **LEMO** group

With a history spanning over 75 years of excellence and innovation, the LEMO Group proudly stands as a global leader in custom high-performance interconnection solutions. Founded in Switzerland in 1946, LEMO specialises in designing and manufacturing precision custom connections and cable solutions. With over 90,000 product combinations, continually expanding through custom-specific designs, our subsidiaries and distributors have forged a global network of dedicated local resources with unparalleled technical expertise and understanding of customer needs. Thanks to this global network, we serve over 150,000 customers in more than 80 countries worldwide.

Our **application fields**

LEMO solutions excel in critical applications where failure is not an option. Our connections serve key industries including Medical, Security & Defence, Test & Measurement, Semiconductor, Energy & Industrial, Audio Video, Motorsport, Transportation, Aerospace & UAV.
